Message from the Guest Editor

Dear Colleagues,

What role does *place* play in the relationship between environment and (public) health? Is it passive (a foundation? A backdrop?) or is it active (a moderator? A mediator? A determinant?). The papers in this Special Issue will explore these relationships across a range of places (North America, Europe, Central and East Asia, and Sub Saharan Africa), a range of spatial scales (global, national, regional, and local), and a range of environmental exposures (physical environment, built environment, and social/cultural/political environments), in order to provide *place* with pride of place.

Dr. Susan Elliott

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
