Message from the Guest Editors

Environmental planning has become an indispensable tool in our current society. The complexity and dynamism of the processes of pollution or alteration of the territory are phenomena that require new, more comprehensive environmental policies and integrated and integrative approaches. This changing context forces administrations and researchers in this field to develop increasingly sophisticated and demanding frameworks. However, these actions must be carried out taking into account the increasingly multidisciplinary nature of these phenomena, and assuming the principle of reality that forces them to be socially and economically sustainable. This Special Issue seeks contributions involving innovative approaches or relevant case studies regarding environmental policy and management.

Innovative methodologies, frameworks or significant results from relevant case studies related to all these topics are welcome, but similar ones may also be considered for publication if they fit within the scope of this Special Issue.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
