and Health Sciences, University  
of Melbourne, Parkville, VIC 3010,  
Australia

**Dr. Andreea Molnar**

Department of Computer Science  
and Software Engineering,  
Swinburne University of  
Technology, Hawthorn, VIC 3122,  
Australia

Deadline for manuscript  
submissions:

**closed (30 April 2023)**

### Message from the Guest Editors

We are in an age in which we are witnessing a growing convergence of physical, virtual, and knowledge spaces that are shaped by collaborative design to promote social good and broader health and well-being benefits. Purposive participation is bringing together the public, governments, and researchers around common goals of a social good – a positive and pro-active environment that benefits the largest number of people in the largest possible way. Environments by design are ideally about global and local citizens uniting to unlock the potential of individuals, communities, digital technology, information, and collaboration that equitably advances positive societal impact, health and well-being. We invite papers for this Special Issue that combine a high academic standard and focus on qualitative or quantitative research, case studies or perspectives which address the topic, and those which illustrate crowd participation or co-creation methods and convergence(s) across physical and digital knowledge spaces would greatly enhance the Issue.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
