Dr. Juan Francisco Blanco Blanco

Institute for Biomedical Research of Salamanca, Hospital Universitario de Salamanca, 37007 Salamanca, Spain

Deadline for manuscript submissions:

closed (30 September 2021)

Message from the Guest Editors

We are currently experiencing an unprecedented situation across the world with the spread of the COVID-19 pandemic. This situation has produced enormous pressure on the healthcare sector, with hospitals, medical resources, physicians, and nurses close to exhaustion. They have arguably had a positive effect by saving thousands of lives, both on the individuals who have seen their lives upended in different ways and on the management of the largest cities, as well as the productive fabric of each country. In the former, restricting the mobility of a population has been shown as an effective method to reduce the evolution of the pandemic, but the produced psychological cost has not been considered in depth. In the latter, the considerable reduction of public transport services and the severe diminution of travel using personal vehicles have modified the organization of cities and impacted the demand for fuel, leading to significant reductions in fuel prices.

We invite researchers to submit manuscripts on this broad and important topic.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
