

## Evaluating Telerehabilitation for Patients across the Lifespan

Guest Editors:

**Dr. Dahlia Kairy**

**Prof. Michel Tousignant**

**Dr. Rachel Kizony**

**Prof. Patrice L. (Tamar) Weiss**

Deadline for manuscript  
submissions:

**closed (30 November 2021)**

### Message from the Guest Editors

Digital and electronic information and communication technologies (ICTs) are becoming increasingly reliable, affordable, and more widely used, including in healthcare. Telerehabilitation can be defined as the use of ICTs to provide rehabilitation services from a distance. Telerehabilitation offers the opportunity to provide care in a new way and may improve access to quality rehabilitation services.

This Special Issue is open to all subjects related to telerehabilitation, including providing all aspects of **rehabilitation and habilitation care from a distance** (e.g., evaluation, intervention, community integration, monitoring, prevention, education) **using ICTs** (audio and video technologies, electronic health records, virtual reality applications, etc.). We welcome original studies and reviews including studies regarding telerehabilitation efficacy and effectiveness, economic analyses, qualitative studies, and implementation and sustainability studies across the lifespan and across rehabilitation disciplines. Studies using innovative research methods and technologies are welcomed.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
