Evaluation, Leibniz Institute for
Prevention Research and
Epidemiology—BIPS, 28359
Bremen, Germany

Deadline for manuscript
submissions:

closed (28 February 2023)

Message from the Guest Editors

While participation and target group involvement have been at the very heart of health promotion for a long time, the topic has recently gained relevance in the field of knowledge transfer. Approaches like co-creation or so-called living labs acknowledge and value the active role of citizens in the process of knowledge production. The potential of these approaches, but also the challenges that may arise from the tension between practical knowledge and evidence-based practice, require more attention in the field of disease prevention and health promotion.

This Special Issue welcomes empirical studies (qualitative and/or quantitative), evidence syntheses and conceptual papers on the following topics:

- Analyzing the effectiveness of preventive interventions in real-world settings;
- Implementation strategies and sustainability of effective interventions;
- Assessing the scalability of preventive interventions;
- Sociocultural appropriateness and equity implications;
- Innovative methods for interactive knowledge production and transfer.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
