submissions:  
**closed (31 October 2022)**

### Message from the Guest Editors

Dear Colleagues,

A Special Issue on exercise and healthy eating for successful aging with HIV, to be published in the *International Journal of Environmental Research and Public Health*, is being organized. For detailed information on the journal, I refer you to <https://www.mdpi.com/journal/ijerph>.

With the use and advancement of antiretroviral therapy, life expectancy among the HIV/AIDS population has dramatically improved over the years. In the United States, an estimated 50% of people living with HIV (PLWH) have already reached age 50 while, at the same time, facing a higher risk for cognitive, physical, and functional declines. Healthy aging with HIV, however, is possible and can lead to a near-normal life expectancy, but only with effective health promotion along with prevention and management of co-morbidities.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
