Education Sciences, University of
Jaén, CP 23009 Jaén, Spain

Message from the Guest Editors

In this Special Issue, we invite and encourage global/international/cross-cultural perspectives on the intersections of physical, mental, and sexual health, with sexual health broadly defined by the key phrases listed below. We express further interest in understudied phenomena (e.g., paraphilia in non-Western cultures), understudied problems in various areas of the world (Asia, Africa, etc.), and understudied populations, including vulnerable peoples—whether beset by comorbidities/disease/disability or by oppression or neglect. The goal is to bring to light issues concerning sexuality by provoking thought, initiating discussion, and suggesting strategies for understanding and improving sexual health in all types of settings—both high- and low-resource environments.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
