Message from the Guest Editor

Dear Colleagues,

This Special Issue will focus on migrating people in times of societies in transition. Many academic institutions have initiated educational programs, focused on immersive learning, and there is a lot to learn. A multidisciplinary training approach on migrant and refugee health is in scope, as well as public health challenges for infectious surveillance and treatment, mental disorders, people migrating with physical disabilities, and special challenges for the very young and the old people. Working conditions for the new country men and women are important, as well as how migrating can people use their skills in their new country and how both the host and the immigrant can make satisfactory social relations together. We have new challenges, but these challenges are well known historically. There have been numerous migrating populations through the history, and we have always adapted in the end. However, we have big challenges to meet and solve. We hope to receive numerous excellent papers and would like to grant a discount for your submissions.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
