Message from the Guest Editor

Dear Colleagues,

The rapid and unexpected presence of the COVID-19 pandemic created many challenges in the care for older adults living at home. The situation revealed problems but also resulted in several possible solutions for older adults and care workers to deal with problems and challenges. The pandemic will likely cause lasting changes in care delivery at home and result in lessons learned that need to be distributed. A Special Issue of the *International Journal of Environmental Research and Public Health* on "Geriatric Care at Home During the Covid-19 Pandemic" will be launched. This Special Issue will include high-quality quantitative and qualitative research (original articles, critical reviews, research notes, and short communications) on various aspects of COVID-19 and its challenges in geriatric care at home.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
