Message from the Guest Editors

This Special Issue will address Indigenous global health within an ever-changing environment. In particular, we invite work on health behavior, chronic disease and health promotion, environmental health, and digital health in Indigenous communities across the world. We especially seek articles related to Indigenous knowledges (IK) that include traditional ecological knowledge (TEK), climate change adaptation, pandemic impact, and ancestral knowledge is maintained for health and wellbeing across lifespans. Given that land and water are sources of healing and play a prominent role in the lives of Indigenous people, we especially encourage qualitative, quantitative, and mixed-method studies focused on land-based healing and disease prevention.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
