### Message from the Guest Editors

Dear Colleagues,

Urbanization has been an apparent outcome of the advancement of human civilization, as well as cultural prosperity. The resource management and allocation for sustainable urbanization is an issue of concern that deserves further exploration.

To deal with such a significant impact on the environment, efforts regarding the investigations of:

- (1) strategic utilization of available water resources,
- (2) proper planning and exploitation on land system,
- (3) balance of expended resources on sustainable urbanization,
- (4) the quantitative/qualitative benefits resulting from the sustainable use of resources,
- (5) other related implementable measures that enhance the resource consumption efficiency and urban sustainability

are welcome to present in the Special Issue. Hopefully, these studies should be able to build a linkage between current resource allocation practices and future urbanization planning to achieve the ultimate goal of environmental sustainability.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
