Message from the Guest Editors

Dear Colleagues,

The world's population is aging faster than in recent decades. Age is associated with increases in chronic diseases, morbidity, frailty, disabilities, and dependence, resulting in a greater use of health services and health care costs. This results in increased demand for care, primarily from the informal system, with the main caregivers often being women. Institutionalization is sometimes perceived as a failure of care. To respond to this issue, a multidisciplinary involvement and approach is needed at all levels of care. In recent years, the amount of scientific research and policy development has grown, addressing subjects such as digital health, which represents a driver of change towards new care models including eHealth, mHealth, telemedicine, telehealth, and many more.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
