Message from the Guest Editor

The Special Issue will focus on patients' perspective as experts, on their challenges and health-care-related experiences embedded in a biopsychosocial framework. Research on experiences will build the core of this issue. They will not only provide insights into complex health care situations and ethical-related questions but also into patient-centered problems as a possible starting point for improving the health care system and/or policy. It will also include an interprofessional perspective on patients' health care providers, relatives or significant others. This Special Issue offers an opportunity to publish high-quality papers on health and illness narratives to health-related topics based on qualitative research, including participatory research methodology from the whole spectrum of care, such as health promotion, prevention, chronic diseases, rehabilitation or palliative care. We also welcome high-quality systematic and scoping reviews related to these matters.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
