### Message from the Guest Editors

Dear Colleagues,

At an international level, recognition that action is needed to address inequalities in health was first expressed in the Declaration of Alma-Ata in 1978. Thirty years on, gross inequalities in health continue to exist within and between countries. These inequalities are both avoidable and modifiable.

The aim of this Special Issue (SI) is to highlight pioneering research that explores innovative ways to understand and respond to the inequalities experienced by socially disadvantaged and marginalised communities. This includes but is not limited to First Nations and Indigenous populations and populations forced to flee from countries of origin due to war and human rights abuse. By highlighting these issues, this SI will shine a light on the role of research, policy and community partnerships and innovative research practices in addressing health inequalities and achieving change. This SI invites researchers of any discipline that focus on health inequalities in socially disadvantaged communities including social science, public health, anthropology, law and medicine.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
