Message from the Guest Editors

Chronic diseases account for a considerable part of the strain on health care systems. They are also burdensome for each affected individual and their families. In recent years, the concept of health literacy has been substantially elaborated on, particularly with regard to its definition, its transfer into the digital world, the development and conduct of interventions, and efforts to improve its measurement.

While advancements are uncontested, the specific demands of chronically ill people for health literacy skills, health literate environments, and challenges attached to these demands remain unchanged. Furthermore, specific aspects of health literacy advancements are either still unresolved or emergent because of dynamic developments in health and health care.

Deadline for manuscript submissions: closed (31 January 2022)

Message from the Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation, Richard Dixon Research Center, Morgan State University, 1700 E. Cold Spring Lane, Baltimore, MD 21251, USA Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
