Dr. Carlos Suso-Ribera

Department of Basic Psychology, Clinical Psychology and Psychobiology, Universitat Jaume I, 12071 Castellon de la Plana, Spain

Dr. Sabrina Cipolletta

Department of General Psychology, University of Padua, 35131 Padua, Italy

Message from the Guest Editors

How can ICTs help us to improve eHealth and mHealth? Information and communication technologies are shaping the way health and mental health are managed. The aim of this Special Issue is to publish studies concerning efficacy, (cost-)effectiveness, acceptability, usability or user experience issues of systems aimed to improve the quality of life, mental health or eHealth management in young and older adults.

Special attention will be given to innovative submissions using ICTs to improve the current health management model. Other manuscript types of interest include systematic reviews, relevant position papers, and brief reports.

Deadline for manuscript submissions:

closed (21 April 2022)

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
