Angeles, CA 90033, USA

Deadline for manuscript
submissions:

closed (31 August 2022)

Message from the Guest Editor

Exposures to environmental chemicals during critical periods including pregnancy and in early life are of critical concern for children's health. Exposure to air pollutants, pesticides, toxic metals, endocrine-disrupting chemicals, and emerging chemical exposures during these susceptible periods are associated with birth outcomes, cardiometabolic health, neurodevelopment, and respiratory health.

This Special Issue of the *International Journal of Environmental Research and Public Health (IJERPH)* focuses on the current state of knowledge on the links between prenatal and early life exposures and health outcomes in children. New research papers, reviews, case reports, and conference papers are welcome for this issue. Other manuscript types accepted include methodological papers, position papers, brief reports, and commentaries.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
