Message from the Guest Editor

Access to healthcare is a basic human right, and yet so many people struggle to receive the care they so desperately need. Those in greatest need of healthcare are often those who receive the least, particularly vulnerable populations, including people experiencing homelessness and poverty, and marginalized members of our communities.

In this Special Issue, we welcome submissions of papers that use creative and robust approaches that will deepen our understanding of the challenges of accessing and using healthcare by vulnerable populations, and how these can be overcome. We invite papers for consideration from any healthcare setting and any methodology. Examples include studies that explore the association between vulnerability and healthcare utilization; those that examine models of care that optimize access for vulnerable populations, recognizing vulnerability, human rights approaches, co-production, and complex systems approaches; and strength-based approaches. All articles must make a strong contribution to healthcare science and expand our understanding of the relationship between vulnerability and health service utilization.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
