Providing Appropriate Health Care in Patients with Myelodysplastic Syndromes and Clonal Hematopoiesis

Guest Editor:

Prof. Dr. Nicolas Bonadies

Department of Hematology and Central Hematology Laboratory, Inselspital, Bern University Hospital, University of Bern, Bern, Switzerland

Deadline for manuscript submissions:

closed (31 May 2021)

Message from the Guest Editor

Incident cases of patients with myelodysplastic syndromes and clonal hematopoiesis are on the rise, with a relevant impact on health care systems. This can be accredited to aging of the general population, improved cancer survivorship, but also an increase of sensitivity in detecting clonality in patients with unclear cytopenia. Due to the heterogeneity of the presentations and the mainly elderly population with many comorbid conditions. the management plan for diagnosis and treatment can be complex and resource-intensive. Therefore. investigation of appropriate health care provided to patients with MDS and clonal hematopoiesis is of emerging interest for our health care systems.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase,

GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
