

Second Edition: Healthcare Services and Epidemiology for Chronic Disease Management and Prevention

Guest Editors:

Dr. Ramune Jacobsen

Research Group for Social and Clinical Pharmacy, Department of Pharmacy, Faculty of Health and Medical Sciences, University of Copenhagen, 2100 Copenhagen, Denmark

Dr. Mina Nicole Händel

Research Unit for Dietary Studies, The Parker Institute, Frederiksberg Hospital, Capital Region of Denmark, 2000 Frederiksberg, Denmark

Deadline for manuscript submissions:

closed (31 October 2023)

Message from the Guest Editors

Following the first edition's success, we are organizing a second edition Special Issue on healthcare services research for chronic disease management, and on epidemiology for chronic disease prevention in the IJERPH. Chronic diseases are common, cause long-term health problems, require lifelong healthcare, and bear tremendous costs. To address the growing healthcare demands, new healthcare delivery models, often driven by developments in technology, are emerging, promising optimization of healthcare and minimization of healthcare costs. Simultaneously, public health efforts allocated to health promotion and disease prevention also lessen the chronic disease burden. Continuous and diverse research in chronic disease management and prevention is thus paramount to support further improvements in healthcare and advance our knowledge of disease prevention. This Special Issue aims to highlight problems and solutions of chronic disease management and prevention addressed and exemplified utilizing various quantitative research methods.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
