Deadline for manuscript submissions:

closed (31 May 2023)

Message from the Guest Editors

In recent decades, the profound impact of social determinants and gradients on health outcomes have been extensively documented worldwide, and policy implications have received serious consideration by various countries, particularly more advanced economies. However, initiatives and policies for tackling health inequalities have not received as much attention. With population ageing, the number of older adults is increasing rapidly. However, compared with that on other ageing groups in the life course, research documenting health inequalities and societal responses to tackle such inequalities is sparse. This Special Issue seeks to highlight areas of concern worldwide, and how various societies formulate policies or mobilize civil society to tackle health inequalities among older adults.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
