Faculty of Social and Human Sciences, University of Deusto, Unibertsitate Etorb., 24, 48007 Bilbo, Bizkaia, Spain

Dr. Ariadna Munté-Pascual

Social Work Training and Research Section, University of Barcelona, 08035 Barcelona, Spain

Deadline for manuscript submissions:

closed (31 May 2022)

Message from the Guest Editors

The COVID-19 pandemic has accelerated the existing concerns about how health information spreads and the need of mitigating false news, conspiracy theories or misleading contents. This is particularly relevant in the case of vulnerable groups, for whom the impact of health inequalities is still a dimension to be further investigated. This Special Issue addresses the ways in which health information (including “infodemic”) reaches vulnerable groups, the limitations of such information and the actions which are having success in overcoming these limitations. We welcome manuscript submissions from different disciplines and all social aspects about actions showing to be effective in providing solutions with regards health information for migrant families, elderly people, homeless, Roma, youth, women, indigenous groups, or any other vulnerable group. The contributions will provide elements of success with potential to be transferable to vulnerable groups in other social contexts, thus generating social impact.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
