Deadline for manuscript
submissions:

closed (29 March 2023)

Message from the Guest Editor

Dementia is a syndrome characterized by a deterioration in cognitive function beyond what is expected from normal ageing. More than 55 million people are living with dementia globally. Dementia has created physical and psychosocial impacts on the individuals, but also their families and caregivers. Much can be done to support and enhance their lives. This Special Issue calls for high-quality, multi-disciplinary research papers which aim to present innovative interventions to address the issues associated with dementia. We anticipate that the collection of articles will inform practitioners and administrators of the latest evidence and will facilitate the translation of the evidence into practice. Topics of interest include, but are not limited to, the following: telehealth intervention during pandemic; virtual and augmented reality intervention; intervention for enhancing caregivers' empathy; empowerment intervention for people with young-onset dementia; multi-sensory intervention using technology; simulated presence therapy; dyadic psychosocial intervention; mindfulness-based intervention for people with dementia; serious gaming; and art-based intervention.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
