Deadline for manuscript  
submissions:

**closed (30 November 2022)**

### Message from the Guest Editors

The COVID-19 pandemic does not affect people equally and has highlighted – and widened - health inequities and unequal access to social determinants of health. We may be in the same storm but we are definitely not all in the same boat. As the pandemic has overwhelmed our health, social and economic systems, some communities and individuals have higher risks of contracting and transmitting COVID-19, greater social consequences of public health measures (e.g. lockdown), and significantly worse physical, social and emotional health outcomes. These impacts interact and can compound risks, which further compound inequities.

We invite quality articles which examine these ‘cracks where the light is showing through’ - opportunities and challenges for improving health equity during COVID-19. We are particularly interested in empirical articles that document the engagement of impacted communities in response to the current crisis, across community and system level, structural change, in order to achieve health equity.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
