Deadline for manuscript submissions:

closed (30 April 2023)

Message from the Guest Editor

Dear Colleagues,

I am organizing a Special Issue, titled "Emerging Research in Maternal and Child Healthcare", in the *International Journal of Environmental Research and Public Health*, a peer-reviewed journal that publishes articles and communications in the interdisciplinary area of environmental health sciences and public health. For detailed information on the journal, please refer to <https://www.mdpi.com/journal/ijerph>.

Women's health is a major concern all over the world. During pregnancy, women may encounter complications including preterm births, spontaneous or artificial abortion, gestational hypertension, gestational diabetes and placental pathologies. The incidence of maternal and perinatal complications is much higher in these high-risk pregnancies when compared with those in normal pregnancies. The related maternal and child healthcare has been an important issue and remains to be explored.

This Special Issue solicits any original contributions and reviews that explore the natures of diseases and health impacts on pregnant women and their children in different countries and communities.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
