Deadline for manuscript submissions:
closed (15 March 2023)

Message from the Guest Editors

The mental health effects of COVID-19 have been profound. The mental health consequences may be more pronounced in low and middle-income settings and among at-risk populations that are at higher risk of experiencing negative mental health effects. Healthcare workers and others on the frontlines, essential workers, vulnerable groups may be at higher risk of negative mental health impacts and may experience unique barriers in accessing care. It is essential to understand the needs of these populations and to identify strategies to improve equity in access to mental health services.

Researchers are invited to submit manuscripts related to any area of mental health care among at-risk populations in the context of COVID-19. Papers can focus on community-based interventions and/or policy. We will consider original quantitative/qualitative research articles (max 4000 words, excluding references and tables) and review articles. We also invite critical reflections regarding the methodological and ethical challenges of conducting healthcare research/providing mental health services. We encourage papers on research that has been conducted in partnership with people with lived experience.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.
Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
