Message from the Guest Editor

Dear Colleagues,

COVID-19 has changed the way we live and has undoubtedly had an impact on mental health and well-being. The Special Issue calls for papers which aim to examine the mental health consequences of COVID-19 from a social-psychological perspective. We specifically seek to answer questions such as: “What are the social determinants of well-being and resilience during the pandemic?”, “How did the pandemic put a strain on harmonious intergroup relations?”, “What was the specific impact of COVID-19 on the mental health of ethnic-cultural minority members, immigrants, and other disadvantaged groups in society?”, “What are the motivational underpinnings of lockdown-, vaccination-, and other COVID-related behaviors?”, “Did the pandemic change the political landscape and citizens’ support?”. We encourage contributions, to integrate two or more theoretical models, investigate long-term social consequences of COVID-19, and/or offer crucial implications for policy makers targeting interventions. We are especially interested in articles from social groups or geographic locations that are under-represented in the journal.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
