### Message from the Guest Editor

Dear Colleagues,

Mental health literacy (MHL) is a multifaceted concept including several components: (1) maintenance of positive mental health, (2) recognition of mental disorders, (3) mental illness stigma attitudes, (4) help-seeking efficacy (i.e., knowing when and where to receive mental health services), and (5) help-seeking attitude. MHL is associated with positive attitudes toward seeking professional psychological help as well as the utilization of mental health care. MHL is also associated with positive mental health outcomes (e.g., psychological well-being). Papers addressing the abovementioned components, including survey research, intervention studies, systematic reviews, and meta-analyses, are invited for this Special Issue.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
