Message from the Guest Editors

Dear Colleagues,

We are pleased to announce the Special Issue entitled “Qualitative Inquiry in Mental Health Research with Young People”. Qualitative research provides a voice for research participants to offer authentic experiential evidence that can be used to inform and influence policy and mental health service provision from an evidence-based perspective. Qualitative inquiry provides richly textured, thick description, or deep understanding to supplement the breadth of understanding afforded by quantitative methods, elicit the perspectives and lived experience of research participants, explore issues that have not been well studied, develop conceptual theories or test hypotheses, or examine a phenomenon or intervention.

We are looking forward to receiving your excellent work.

Dr. Katherine M. Boydell

Dr. Michael Hodgins

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
