### Message from the Guest Editors

For this Special Issue, we welcome studies on the impact of relational and social stressors on the emotional and mental health of women and the psychological, physical, and social consequences of, and potential growth and resilience due to, suffering interpersonal or social violence. Topics of interest to this Special Issue include, but are not limited to, gender violence, political violence, sexual exploitation and trafficking, sexual aggression, immigration, and economic deprivation and disadvantage. We welcome public health studies that address the situations that lead to enhancing or reducing the mental and emotional distress suffered by women. We encourage studies that employ cross-sectional, longitudinal, cross-culture, and mixed-model methods.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.
