Deadline for manuscript submissions:
closed (31 July 2023)

Message from the Guest Editor

As mobile devices have become ubiquitous, there has been an increasing interest in the development and adoption of mobile health (mHealth) apps for many aspects of clinical and home care. Examples include but are not limited to data gathering, clinical decision making, education and training, communication and referencing, patient monitoring and management, shift management, etc. Moreover, mHealth apps are now being implemented to help formal and informal health professionals to engage with, study, and interpret their own health behaviors, which has a direct impact on their practice. Such advancements call for a comprehensive research approach that is better aligned with the needs of health professionals and their work environments. Papers addressing these topics are invited for this Special Issue, especially those combining theory with practical solutions to problems faced by healthcare professionals.

Special Issue

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.
Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
