Message from the Guest Editors

Dear Colleagues,

Oral-health-related quality of life (OHRQoL) is considered an integral part of general health and well-being, encompassing the subjective perception of the state of oral health, functional and emotional well-being, expectations of and satisfactions with the dental care received, and self-esteem. The FDI World Dental Federation (FDI) considers oral health to be multifaceted, including the ability to speak, smile, smell, taste, touch, chew, swallow, and express a range of emotions through facial expressions with confidence and without pain and discomfort, and with the absence of craniofacial complex diseases. In this context, oral diseases and disorders can have negative impacts on OHRQoL, affecting oral functions, self-esteem, general well-being, and social activities. Papers dealing with new approaches to OHRQoL measures complemented by clinical and behavioral indicators, providing support to oral health needs, are welcome. The psychosocial, environmental, cultural, and economic aspects involved in OHRQoL, and guided oral health policies to incorporate patient-centered approaches and assessed treatment needs, may also be addressed.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
