Message from the Guest Editors

We invite you to contribute to our Special Issue, “Musculoskeletal Physiotherapy and Rehabilitation”, which aims to enhance evidence about the assessment and treatment strategies addressed to musculoskeletal conditions and its repercussions on patients’ lives.

Musculoskeletal disorders are among the most disabling conditions worldwide. It is generally related to chronic conditions that affects sensorial, physical, and social dimensions. This Special Issue welcomes well-designed and good-quality studies about musculoskeletal disorders, their impact, and treatment. We also welcome studies related to musculoskeletal function and the measurement properties of the instruments used in their assessment are important because it would help us to trust in the data obtained during our assessment and to rationalize the treatment approach. Studies using quantitative, qualitative, mixed-methods or systematic reviews with or without metaanalysis are considered.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
