Message from the Guest Editor

Dear Colleagues,

The complexity and growing risks of natural hazards require an interdisciplinary approach to manage environmental threats, including unique strategies for hazard preparedness, mitigation, planning and management. Global climate change is a growing hazard, and specific tools are needed to lower greenhouse gas emissions, mitigate the extent of climate change, and adapt to global temperature rise. This Special Issue is seeking original, unpublished papers that describe recent advances in various environmental hazard and threat issues in relation to a cross-cutting, interdisciplinary perspective. While a technical perspective is welcome, a systems approach is encouraged to promote state-of-the-art solutions that can address environmental risk at local, national, or global scales.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
