and Department of Research in
Emergency Medicine and
Simulation, University Hospital of
Amiens and University Jules
Verne, 80000 Amiens, France
2. IAME Research Unit "Infection,
Antimicrobials, Modelling,
Evolution", INSERM UMR1137,
University of Paris, 75018 Paris,
France

Message from the Guest Editors

In addition to their mission of providing care, hospitals, and particularly Emergency Departments (ED), play a public health role. EDs often manage social problems, including poverty and social instability. Hospitals and their EDs are refuges for insecure local populations and migrants arriving in a given country. Emergency physicians are also led to manage consultations for administrative and legal reasons. Thus, non-emergent ED utilization and non-emergency care can represent up to 50% of the activity of an ED. This non-urgent care obviously impacts ED and hospital non-scheduled activities.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
