Message from the Guest Editor

Dear Colleagues:

Obesity and diabetes have emerged as significant public health problems globally with no sign of stopping. This has created enormous burden both socially and economically in the society. There is a great need of a better understanding about factors contributing to obesity and diabetes in various life stages, and finding effective and cost-effective prevention strategies. In addition, advances in communication technologies in recent years have opened new possibilities for innovative public health interventions. But there is lack of understanding of feasibility, acceptability and effectiveness of mobile applications for obesity and diabetes prevention.

We invite investigators to contribute original research articles or review articles that will contribute to the body of evidence of understanding risk factors for obesity and diabetes and demonstrating effective and cost-effective prevention programs for reducing obesity and diabetes at various life stages.

This Special Issue is open to any subject area related to research into obesity and diabetes prevention and effectiveness.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
