Message from the Collection Editors

Dear Colleagues,

The novel coronavirus disease (COVID-19) is a global public health emergency. There are many concerns relating to the impact of SARS-CoV-2 infection on pregnant women and their fetuses, as well as the challenge of gynecological patient management in the context of COVID-19.

Moreover, preventive health in the OB/GYN patient population is key, and practitioners should become comfortable with providing education about topics as diverse as sexuality, eating disorders, and dating violence, especially in post-pandemic times.

This Topical Collection seeks the latest research, guidance and opinions on COVID-19 in obstetric and gynecological settings, including management of infected pregnant women, rationalization of ultrasound services and risk mitigation for both patients and practitioners during the current pandemic. We also welcome high-quality systematic reviews related to these matters.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
