submissions:

**closed (31 July 2021)**

### Message from the Guest Editors

Although the epidemiology of the current global coronavirus (COVID-19) pandemic continues to emerge, those at high risk for severe illness include older adults with multimorbidity and persons living in residential care facilities. A broad range of areas relating to the health and well-being of older people are potentially affected by the pandemic and societal responses to it. Examples of relevant issues include the impact of social distancing policies on older people, and community and neighbourhood support efforts for older citizens; the experiences of front-line health and social care providers working with older patients; social determinants of morbidity and mortality outcomes for older COVID-19 patients; and factors that predict emotional resilience among older adults during the pandemic.

The goal of this Special Issue is to identify vulnerabilities and risks posed by COVID-19 to older people's health and well-being, and its impacts on their carers. It aims to provide wide-ranging reports of the experience and effectiveness with older adults of public health strategies adopted to manage the pandemic.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
