Message from the Guest Editor

Dear Colleagues,

The oral health status of populations involves a complex network of determination. There is evidence in the scientific literature on the importance of social determinants of health and specifically in oral health. The investigation of environmental factors on oral health needs to further progress. Knowledge of these determinants allows us to propose strategies for overcoming inequalities in oral health. This is one of the challenges of today's world. This special issue will examine studies of social and environmental determinants of oral health.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
