Message from the Guest Editor

Dear Colleagues,

The COVID-19 pandemic has been a challenge in different contexts, including oral health. On the one hand, dentists and other professionals related to oral health have experienced fast changes in their practices, with transmission of COVID-19 in dental clinics or infection control and measures being some of the concerns they face, potentially resulting in clinical and emotional consequences.

On the other hand, patients have also faced new challenges, for example, oral manifestations and/or sequelae of COVID-19 or a deterioration of their oral health due to the use of face masks and possible changes in the oral microbiota. Fear of going to the dentist could also be present and lead to delays in diagnoses and treatment of diseases of the oral cavity.

This Special Issue aims to identify the implications of COVID-19 in the different scopes of oral health as a first step to the development of preventive strategies.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
