Deadline for manuscript  
submissions:

**31 August 2024**

### Message from the Guest Editors

Primary Health Care plays an essential role in 21st Century Medicine and it is probably the most important reference system that can deal with the huge challenges brought by the beginning of this century. The use of technology, the COVID-19 pandemic, the empowerment of the patients, the increasing importance of pediatrics, and the crisis in costs are challenging the medical practices of the last century. This Special Issue provides opportunity to satisfy the needs of the primary health care professionals, so we can provide them with the necessary tools to deal with these enormous challenges. We are looking for manuscripts focused on health technology, especially apps, websites or other tools, that can help professionals and patients, especially parents and children, empower patients and help to overcome the COVID-19 pandemic, and deal with increasing costs, from the perspective of primary health care. Thus, we invite the submission of manuscripts describing qualitative or quantitative research in areas such as eHealth, mHealth, mobile or computer apps, pediatrics, COVID-19 and costs, always from the perspective of the role of Primary Health Care in 21st Century Medicine.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
