Message from the Guest Editors

The COVID-19 virus has spread rapidly across the globe in a very short time with catastrophic consequences. The current Special Issue is focused on the role of physical therapy in COVID-19, a topic of emerging relevance. Millions of people will continue to be infected with and will survive COVID-19 infection; [therefore, understanding the potential sequelae and the role of physical therapy in their identification and management should be a priority.](#) We invite researchers/clinicians to submit original articles, systematic reviews, narrative reviews, meta-analyses, case reports, and qualitative studies related to physical therapy and COVID-19 to this Special Issue.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
