Deadline for manuscript submissions:  
**closed (31 March 2023)**

### **Message from the Guest Editors**

Dear Colleagues,

With the rapid development of industrialization, urbanization, and economy, various pollutants, including organics, heavy metals, and biohazards, were released to the environment from the complicated sources of anthropogenic sources as well as natural sources. Therefore, the environment transmission, respiratory exposure, and disease infection caused by the various pollutants have increasingly become hotly contested issues. Many emerging and conventional pollutants have worsened the environmental quality due to their widespread exposure and the additive health impacts on the overall population. However, all these mechanisms are only beginning to unravel.

Today, we are pleased to invite you to contribute a manuscript to this Special Issue “**Advances in Pollutant Exposure and Health Effects**” in the *International Journal of Environmental Research and Public Health (IJERPH)*.

Contributors are welcomed to submit reviews and original research articles, including but not limited to the following topics:

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
