Deadline for manuscript  
submissions:

**closed (31 December 2021)**

### Message from the Guest Editors

Dear Colleagues,

We cannot overemphasize the importance of the ears, nose, and throat in communicating with other people. Air pollution is a growing concern in public health and a recognized risk factor for various diseases. Ear, nose, and throat are the first regions to encounter air pollutants. Ear, nose, and throat diseases include sensory disorders, infections, allergies, and malignancies. Some studies have revealed associations between air pollution levels and ENT diseases such as allergic rhinitis, olfactory dysfunction, and otitis media. However, the effect of air pollution on ear, nose, and throat diseases has not been well defined and investigated. Papers addressing these topics are invited for this Special Issue, especially those addressing the risk and mechanism of air pollutants on the ear, nose, and throat and providing optimal solutions. Epidemiology studies, clinical studies, basic research papers, and review papers are welcome to this Issue.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
