Deadline for manuscript
submissions:
closed (28 February 2022)

Message from the Guest Editor

Worldwide maternal and child health-related outcomes are markedly affected by environmental and socio-demographic factors including access to health care, vaccination, good nutrition, adequate housing, clean water and sanitation, education and employment. Maternal nutrition and cardiometabolic health are also powerful determinants of gestational outcomes.

This Special Issue of the *International Journal of Environmental Research and Public Health (IJERPH)* aims at advancing scientific and professional knowledge in the maternal, newborn and child health field. We believe that this issue will be an excellent forum for disseminating outstanding research findings as well as sharing good practice and innovative ideas for improving maternal and child health.

This Special Issue will accept manuscripts addressing maternal and child health practice, policy and research, exploring a wide range of topics and disciplines, such as epidemiology, public health, nutrition, social sciences, demography, health status assessment, innovative service initiatives, service evaluation, economic evaluation, policy analysis, advocacy and professional development.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
