Deadline for manuscript  
submissions:

**closed (30 April 2022)**

### Message from the Guest Editors

*The Special Issue* aims to understand sexual violence against women. This high-prevalence phenomenon impacts the physical, mental, and social health of women. Traditionally, sexual violence has been known to be perpetrated by strangers; however, research in this field has recently found that men who keep a close relationship with victims might exert such violence (e.g., romantic partners, colleagues, friends) as well.

We call for unpublished papers that address this phenomenon considering both sides of the coin: men who perpetrate sexual violence and women who are the victims of such men. Moreover, this Special Issue is interested in the different manifestations of sexual violence from the subtlest (e.g., sexual objectification or sexual coercion) to the most explicit experiences (e.g., sexual harassment or rape).

We welcome theoretical, review, and empirical papers that allow us a better general understanding of this complex phenomenon, as well as studies that specifically focus on identifying variables associated with a greater risk of sexual violence victimization and perpetration.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
