Message from the Guest Editors

Dear Colleagues,

This Special Issue focuses on the psychosocial treatments that are used routinely in real-world clinical settings.

Special Issue "Psychosocial Treatments in Routine Mental Health Care" is devoted to gather evidence on experiences upon implementing psychosocial interventions. The resulting issue shall include manuscripts mirroring the potential of interconnecting studies across diagnoses; those from an interdisciplinary perspective within the variety of mental health professionals; those tapping into the diversity of clinical settings; as well as, across countries experiences.

In this Special Issue, submission of original research articles, clinical practice and methodological innovations, and theoretical manuscripts upon barriers and supportive factors involved in implementing evidence-based psychosocial interventions are welcome.

Dr. Joan Trujols

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
