Deadline for manuscript  
submissions:

**closed (30 June 2022)**

### Message from the Guest Editors

Rehabilitation is one of five main health strategies and an integral part of Universal Health Coverage. However, the World Report on Disability that was published by the WHO in 2011 provided strong evidence that around the world a huge number of persons in need of rehabilitation do not have access to rehabilitation services. Ten years later it is important to look at changes, new epidemiological data, rehabilitation concepts, and their integration into health systems.

The Special Issue “Rehabilitation in Health Systems, Rehabilitation Needs, and Innovative Rehabilitation Programs” is opened for scientific papers addressing these topics: the integration of rehabilitation in health systems; rehabilitation needs; outcomes of rehabilitation programs are welcome. Methodological papers are also welcome. The Editors will be happy if rehabilitation concepts in low- and lower-middle-income countries including community-based rehabilitation can be included in the Special Issue. Papers on vulnerable groups and rare diseases are welcome too.

The papers of the Special Issue can contribute to WHO’s initiative “Rehabilitation 2030—a Call for Action”.

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

**Journal Rank:** CiteScore - Q1 (Public Health, Environmental and Occupational Health)
