Message from the Guest Editors

Dear Colleagues,

Pneumonia and interstitial lung diseases are some of the non-malignant respiratory diseases that contribute significantly to the global burden of respiratory diseases. Air pollution, smoking, vaping, allergies, and occupational exposure are some of the most important risk factors for respiratory diseases. Manuscripts that deal with clinical characteristics (etiology, physiological mechanism, and clinical outcome), occupational and environmental aspects (longitudinal and cross-sectional occupational and environmental exposure, panel data study, etc.), and mechanistic insights (basic and translational research that are clinically relevant) are very welcome. We will also evaluate other types of articles, such as systematic reviews (and meta-analyses) and commentaries. The recommended topics include, but are not limited to, the following:

- Asthma
- Chronic obstructive pulmonary disease (COPD)
- Interstitial lung diseases (ILD)
- Pneumonia
- Environmental exposure
- Occupational exposure
- Longitudinal studies
- Epidemiological studies
- Respiratory physiology
- Obstructive sleep apnea

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (Public Health, Environmental and Occupational Health)
